Admission requirements for Master program in Business Information Technology

To be admitted to our Master’s program Business Information Technology with focus on Data Science and Consulting you need a first academic degree with 180 ECTS-points in business information technology, information technology, economics, or a comparable degree with an average grade of 2.7 or better.

Applicants without a first academic degree in business information technology or economics have to prove their basic knowledge in fields like accounting, investment and financing, HR management, marketing, production, logistics, and management. 20 ECTS-points or more in total in these fields of knowledge are considered to be sufficient. Alternatively, applicants get the opportunity to prove their knowledge in these fields by means of a written exam, in which 50% of the maximum score must be achieved.

Applicants without a first academic degree in business information technology or information technology have to prove their basic knowledge in programming, databases and web applications by means of written exams. The test is passed if at least 50% of the maximum score has been achieved.

The main language of instruction in all our Bachelor and Master programs is German. Therefore we require German language proficiency which you may prove as follows:

- "Deutsche Sprachprüfung für den Hochschulzugang-2 (DSH-2)" from a university in Germany
- C1 Certificate from the Goethe Institute
- “Test-Deutsch als Fremdsprache (TestDaF)” with the result of at least “4” in all four parts of the test
- “Deutsches Sprachdiplom II (DSD II)"
- “Österreichisches Sprachdiplom” (ÖSD C1)

If you are interested in preparing your German language proficiency test in our region, please find service providers following this link.

As a significant part of our courses and most of the relevant literature is in English. English language skills are required according to Level B2 of the Common European Framework of Reference for Languages (CEFR).
